THE WORLD'S BEST DECORATIVE STAINLESS STEEL

MADE IN JAPAN

TSUKIBOSHI ART

THE WORLD'S BEST DECORATIVE STAINLESS STEEL

OVERVIEW

Tsukiboshi Art Co., Ltd. started elaborately designed stainless steel business in 1961, based in Amagasaki, Japan.

We are proud of always supplying new products which we apply high technology on solid material, until we have been No.1 company in this industry.

We should be the best choice among customer to supply our high quality product and provide a solution.

We will make customers and our dream come true. In order to achieve these objects, we will seriously work on develop new product and establishing high technology.

We also work hard to contribute society and keep growing our business.

NEUES

Sputtering coated high-grade decorative stainless steel "NEUES" is coated by one type of dry coating process with ceramic. This new type of product has a clear and fine color tone, while retaining the natural characteristics of stainless steel, especially high abrasion resistance due to hard ceramic coating.

PRODUCT FEATURES

- Ceramic specific crystal color tone.
Colored product emphasizing surface finish of the material.
Beautiful coloring of crystal looking, and above all, "GOLD" finish looks like real gold.
- Excellent in harmonious coloring all over the sheet, and reproduction between lots.
- Excellent antiabrasiveness.
Coated by ceramics with high film hardness, excellent anti-abrasiveness is obtained.
- No limitation for stainless steel grade or surface finish.
Coating can be made for every stainless steel grade besides SUS304.
- Coating can be made on formed products.
Hardware as building material and furniture pipes can be well coated with harmonious color one film repeating, when the surface is cleanly finished.
- Corrosion resistance.
Please usually apply it to the interior use.

TSUKIBOSHI ART

THE WORLD'S BEST DECORATIVE STAINLESS STEEL

NEUES

NEUES is a product the surface of which is coated with nitride and carbonate and the coating technology is a kind of dry coating. This is an application of sputtering technology. We applied this technology, which was used only for small ornamental goods before to wide stainless steel sheet and succeeded in mass production as building material first in the world.

Attractiveness of NEUES is expressed, above all, refined color beautiful metallic tone, and most fitted as interior material and elevator door that require high design variety, besides its wide applicability.

APPLICATIONS	Category & Exterior	Major Applications
	Interior materials	Wall panels, ceiling panels, front sashes, pillar covers, partition panels, etc.
